REPORT OF THE BOARD OF DIRECTORS

The Board of Directors (the "Directors") is pleased to present its report and the audited financial statements of AMK Microfinance Institution Plc. (the "Company") for the year ended 31 December 2019.

PRINCIPAL ACTIVITIES

The principal activity of the Company is to provide loans, savings and other related financial services through its head office in Phnom Penh and its various offices in the Kingdom of Cambodia.

FINANCIAL RESULTS

The financial performance of the Company for the year ended 31 December 2019 is set out in the statement of comprehensive income on page 10.

RESERVES AND PROVISIONS

There were no material movements in reserves and provisions during the year other than those disclosed in the financial statements.

DIVIDENDS

There was no dividend declared or paid during the year (2018: nil).

SHARE CAPITAL

The paid up capital of the Company as at 31 December 2019 is KHR'000 159,174,950 or approximately US\$ 39,061,337 (2018: KHR'000 120,327,300 or approximately US\$ 29,947,063).

BAD AND DOUBTFUL LOANS

Before the financial statements of the Company were prepared, the Directors took reasonable steps to ascertain that appropriate action had been taken in relation to the writing off of bad loans and making allowance for doubtful loans, and satisfied themselves that all known bad loans had been written off and adequate allowance had been made for bad and doubtful loans.

ASSETS

Before the financial statements of the Company were prepared, the Directors took reasonable steps to ensure that any assets, which were unlikely to be realised in the ordinary course of business at their values as shown in the accounting records of the Company had been written down to amounts which they might be expected to realise.

At the date of this report, the Directors are not aware of any circumstances, which would render the values attributable to the assets in the financial statements of the Company misleading.

VALUATION METHODS

At the date of this report, the Directors are not aware of any circumstances which have arisen which render adherence to the existing method of valuation of assets and liabilities in the financial statements of the Company misleading or inappropriate.

CONTINGENT AND OTHER LIABILITIES

At the date of this report, there does not exist:

- (a) any charge on the assets of the Company which has arisen since the end of the year which secures the liabilities of any other person except as disclosed in the financial statements; and
- (b) any contingent liability in respect of the Company that has arisen since the end of the year other than in the ordinary course of its business operations.

No contingent or other liability of the Company has become enforceable, or is likely to become enforceable within the period of twelve months after the end of the year which, in the opinion of the Directors, will or may substantially affect the ability of the Company to meet its obligations as and when they fall due.

CHANGE OF CIRCUMSTANCES

At the date of this report, the Directors are not aware of any circumstances, not otherwise dealt with in this report or the financial statements of the Company, which would render any amount stated in the financial statements misleading in any material respect.

ITEMS OF AN UNUSUAL NATURE

The results of the operations of the Company for the year were not, in the opinion of the Directors, substantially affected by any item, transaction or event of a material and unusual nature.

There has not arisen in the interval between the end of the year and the date of this report any item, transaction or event of a material and unusual nature likely, in the opinion of the Directors, to affect substantially the results of the operations of the Company for the current financial year in which this report is made.

EVENTS AFTER THE REPORTING DATE

No significant events occurred after the statement of financial position date requiring disclosures or adjustments other than those disclosed in the financial statements, if any.

THE BOARD OF DIRECTORS

The members of the Board of Directors holding office during the year and at the date of this report are:

Mr. Tanmay Chetan	Chairman	
Mr. Kea Borann	Director	
Mr. John Con-Sing Yung	Director	
Mr. Ru-Hung Wei	Director	
Mr. Chin-Kang Liu	Director	
Mr. Wei-Kuo Yen	Director	(Appointed on 16 July 2019)
Ms. Pi-Fen Hsieh	Director	(Resigned on 19 March 2019)
Mr. Tip Janvibol	Independent Director	
Ms. Heng Seida	Independent Director	
Mr. Blandine Claudia Marie Pons	Independent Director	(Appointed on 16 July 2019)

DIRECTORS' INTERESTS

No directors held any interest in the equity of the Company. No arrangements existed to which the Company is a party with the object of enabling the directors to obtain an interest in the Company or in any corporate body.

DIRECTORS' BENEFITS

During and at the end of the year, no arrangement existed to which the Company is a party with the objective of enabling Directors of the Company to acquire benefits by means of the share purchase option.

Since the end of the previous financial year, no Director of the Company has received or become entitled to receive any benefit (other than a benefit included in the aggregate amount of emoluments received or due and receivable by the Directors as disclosed in the financial statements) by reason of a contract made by the Company or a related corporation with a firm of which the Director is a member, or with a company in which the Director has a substantial financial interest other than as disclosed in the financial statements.

RESPONSIBILITIES OF THE DIRECTORS IN RESPECT OF THE FINANCIAL STATEMENTS

The Directors are responsible for ascertaining that the financial statements present fairly, in all material respects, the financial position of the Company as at 31 December 2019, and its financial performance and its cash flows for the year then ended. In preparing these financial statements, the Directors are required to:

- adopt appropriate accounting policies which are supported by reasonable and prudent judgments and estimates and then apply them consistently;
- comply with the requirements of Cambodian International Financial Reporting Standards ("CIFRSs"), or, if there have been any departures in the interests of fair presentation, these have been appropriately disclosed, explained and quantified in the financial statements;
- maintain adequate accounting records and an effective system of internal controls;
- prepare the financial statements on a going concern basis unless it is inappropriate to assume that the Company will continue operations in the foreseeable future; and
- effectively control and direct the Company and is involved in all material decisions affecting the operations and performance and ascertain that such have been properly reflected in the financial statements.

The Directors confirm that the Company has complied with the above requirements in preparing the financial statements.

STATEMENT OF THE BOARD OF DIRECTORS

The accompanying financial statements present fairly, in all material respects, the financial position of AMK Microfinance Institution Plc. as at 31 December 2019, and its financial performance and cash flows for the year then ended in accordance with Cambodian International Financial Reporting Standards, and at the date of this statement, there are reasonable grounds to believe that the Company will be able to pay its debts as and when they fall due.

On behalf of the Board of Directors

Mr. Tanmay Chetan

Chairman

INDEPENDENT AUDITOR'S REPORT

To the shareholders of AMK Microfinance Institution Plc.

Opinion

We have audited the financial statements of AMK Microfinance Institution Plc. (the "Company"), which comprise the statement of financial position as at 31 December 2019, the statement of comprehensive income, statement of changes in equity and statement of cash flows for year then ended, and notes to the financial statements, including a summary of significant accounting policies as set out on pages 8 to 103.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at 31 December 2019, and its financial performance and cash flows for the year then ended in accordance with Cambodian International Financial Reporting Standards.

Basis for Opinion

We conducted our audit in accordance with Cambodian International Standards on Auditing ("CISAs"). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Cambodia, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other matters

The financial statements of the Company as at and for the year ended 31 December 2018 were prepared in accordance with Cambodian Accounting Standards and relevant accounting regulations and guidelines issued by the National Bank of Cambodia and were audited by another auditor who expressed an unmodified opinion on those statements on 14 March 2019.

Information Other than the Financial Statements and Auditor's Report Thereon

Management is responsible for the other information. The other information comprises the Report of the Board of Directors as set out on pages 1 to 4, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Deloitte.

Responsibilities of Management and the Board of Directors for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with Cambodian International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with CISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with CISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud
 or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that
 is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material
 misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve
 collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures
 that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
 effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including
 disclosures, and whether the financial statements represent the underlying transactions and events in
 a manner that achieves fair presentation.

Kl

Deloitte.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

1. REPORTING ENTITY

AMK Microfinance Institution Plc. (the "Company") is a licensed micro-finance institution ("MFI") incorporated and registered in the Kingdom of Cambodia.

The Company was initially established in 1999 as Thanakea Ponleu Thmey ("TPT") Programme by Concern Worldwide Cambodia ("CWC"). All assets, liabilities and accumulated donations of TPT were transferred to the Company on 1 July 2003 against the issue of shares. The Company commenced to trade on the date of the asset transfer. On 29 January 2010, the Company obtained a Microfinance Deposit-Taking Institution ("MDI") license from the National Bank of Cambodia ("NBC") to conduct deposit-taking business. On 7 July 2014, the Ministry of Commerce approved the change in business name of the Company from Angkor Mikroheranhvatho (Kampuchea) Co., Ltd. to AMK Microfinance Institution Plc.

The registered office of the Company is currently located at #285, Yothapol Khemarak Phoumin Blvd. (St. 271), Sangkat Tomnub Teuk, Khan Chamkarmon, Phnom Penh, Kingdom of Cambodia. The Company operates its business in 149 offices (2018: 149 Offices).

The principal activity of the Company is to provide loans, savings and other related financial services through its head office in Phnom Penh and its various offices in the Kingdom of Cambodia.

The financial statements were authorised for issue by the Board of Directors on 16 March 2020.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies adopted in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

2.1 Basis of accounting

The financial statements have been prepared in accordance with Cambodian International Financial Reporting Standards ("CIFRSs").

For all periods up to and including the year ended 31 December 2018, the financial statements were prepared in accordance with the previous framework, Cambodian Accounting Standards ("CAS") and relevant regulations and guidelines issued by the NBC. These financial statements for the year ended 31 December 2019 are the first set that the Company have prepared in accordance with CIFRSs. Details of first-time adoption of CIFRSs are included in Note 2.3.

The financial statements have been prepared on the historical cost basis, except for financial instruments that are measured at revalued amounts or fair values at the end of each reporting period, as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

2.2 Basis of aggregation

The financial statements include the financial statements of the head office and its branches after the elimination of all significant inter-branch balances and transactions.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.3 Adoption of a new financial reporting framework

The Company adopted the new financial reporting framework – Cambodian International Financial Reporting Standards ("CIFRSs") for the first time for financial year ended 31 December 2019 and CIFRS 1 First-time Adoption of Cambodian International Financial Reporting Standards has been applied in the first set of CIFRSs financial statements. CIFRSs is identical to International Financial Reporting Standards ("IFRSs") as issued by the International Accounting Standards Board ("IASB").

As a first-time adopter of CIFRSs, the Company has applied retrospectively, accounting policies based on each CIFRS effective as at end of the first CIFRSs reporting period (31 December 2019), except for areas of exceptions and optional exemptions set out in CIFRS 1. In the first set of CIFRSs financial statements for the financial year ended 31 December 2019, an additional opening statement of financial position as at date of transition (1 January 2018) is presented, together with related notes. Reconciliation statements from previously reported CAS amounts and explanatory notes on transition adjustments are presented for equity as at date of transition (1 January 2018) and as at end of last financial period under CAS (31 December 2018), and for total comprehensive income and cash flows reported for the last financial period under CAS (for the year ended 31 December 2017) and relevant accounting regulations and guidelines issued by the NBC. Additional disclosures are made for specific transition adjustments if applicable.

There is no change to the Company's previous accounting policies under CAS or material adjustments on the initial transition to the new framework, other than those arising from the application of CIFRS 9, CIFRS 15 and CIFRS 16 which are effective at the same time and the disclosure requirements relevant to accounting regulations and guidelines issued by the NBC.

iv) Impact on the statement of cash flows for the year ended 31 December 2018

Certain reclassifications have been made to the presentation of the Company's statement of cash flows to conform to the current year's presentation following the adoption of CIFRSs.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.3 Adoption of a new financial reporting framework (continued)

Reconciliations of equity and total comprehensive income (continued)

Main impacts on the financial statements from the application of CIFRS were as follows:

a. Financial assets and liabilities measured at amortised cost

Under the previous accounting framework, CAS, financial assets including balances with the NBC and loans to customers and financial liabilities including deposits from customers, borrowings, and subordinated debts were stated at principal outstanding and the accrued interest receivables and accrued interest payables were presented in other assets and other liabilities, respectively. On the adoption of CIFRS 9, these financial assets and financial liabilities are measured at amortised cost, resulting in increase of financial assets and decrease of other assets, and increase of financial liabilities and decrease of other liabilities.

b. Interest income at amortised cost

Under CAS, interest income on loans to customers and balances with the NBC was recognised on an accrual basis based on declining balances of the principal amount outstanding, except for loans to customers that have been classified as substandard, doubtful or loss. Interest accruing to these loans was credited to an interest in suspense account. Subsequently, interest income from these loans is recognised on a cash receipt basis. On adoption of the CIFRS 9, interest income is recognised using the effective interest method by applying the effective interest rate ("EIR") to the gross carrying amount of non-credit impaired financial assets or by applying the EIR to the net carrying amount of the credit-impaired financial assets. This adoption results in additional interest income.

c. Loan processing fee at amortised cost

Under CAS, loan processing fee was recognised as income on a straight-line basis over the terms of the loan and was presented in other income. On adoption of the CIFRS 9, loan processing fee is considered to be directly attributable to the origination of the loans and an integral part of the effective interest rate of loans. Hence, it is included in the initial recognition of loans to customers and measured at amortised cost, resulting in other income from loan processing fees being reclassified to interest income as part of amortisation of loan.

d. Impairment of financial assets

Under CAS, allowances for bad and doubtful loans and balance with banks were measured based on the Prakas No. B7-017-344, dated on 1 December 2017, on Credit Risk Grading and Impairment Provisioning, and Circular No. B7-018-001, dated 16 February 2018 on the Implementation of Prakas on Credit Risk Grading and Impairment Provisioning issued by the NBC. On adoption of the CIFRS 9, the impairment of financial assets is measured through a loss allowance for expected credit loss ("ECL"), impacting loss allowance as at 1 January 2018 and as at and for the year ended 31 December 2018.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.3 Adoption of a new financial reporting framework (continued)

Reconciliations of equity and total comprehensive income (continued)

e. Leases

The application of CIFRS 16 to leases previously classified as operating leases under CAS 17 resulted in the recognition of right-of-use assets KHR'000 28,116,488 and leases liabilities KHR'000 26,188,518 as at 1 January 2018 and right-of-use assets KHR'000 26,335,227 and leases liabilities KHR'000 25,482,554 as at 31 December 2018. It also resulted in a decrease in other operating expenses KHR'000 8,068,891 and an increase in depreciation and amortisation KHR'000 7,117,019 and interest expense KHR'000 2,270,882 for the year ended 31 December 2018. Certain reclassification within the statement of cash flows were also made as a result of CIFRS 16 application.

f. Regulatory reserves

According to NBC's Prakas No. B7-017-344 on Credit Risk Grading and Impairment Provisioning, excess amount of impairment calculated in accordance with regulatory provision compared to the impairment calculated under CIFRSs has to be transferred from retained earnings to regulatory reserve within shareholder's equity. This requirement resulted in increase in reserve and decrease in retained earnings but no impact on the profit or loss of the Company.

g. Income tax

The application of CIFRSs resulted in changes in deferred tax arising from the temporary differences in respect of the impairment of financial assets and unused annual leave.

h. Unused annual leave

The application of CIFRSs resulted in recognition of other liability in respect of employees' unused annual leave in the period that related service is rendered.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.4 Foreign currency translation

(i) Functional and presentation currency

Items included in the financial statements of the Company are measured using the currency of the primary economic environment in which the Company operates (the functional currency). Management has determined the Khmer Riel ("KHR") to be the Company's functional currency owing to the significant influence of the KHR on its operations. The financial statements are presented in KHR, which is the Company's functional and presentation currency.

(ii) Transactions and balances

Transactions in currencies other than KHR are translated into KHR at the exchange rates prevailing at the dates of transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in currencies other than KHR at the year-end exchange rates, are recognised in profit or loss.

(iii) Presentation in United States dollar

Assets and liabilities for each statement of financial position presented are translated at the closing rate ruling at each reporting date whereas income and expense items for each statement of profit or loss and other comprehensive income and cash flow items presented are translated at the average rate for the year then ended. All resulting exchange differences are recognised in other comprehensive income.

The financial statements presented in US\$ are based on the following applicable exchange rates per US\$1:

	31 December 2019	31 December 2018	31 December 2017
Closing rate	4,075	4,018	4,037
Average rate	4,052	4,045	4,045

The financial statements expressed in US\$ are unaudited and should not be construed as representation that the KHR amounts have been, could have been, or could in the future be, converted into US\$ at this or any other exchange rate.

2.5 Rounding of amounts

Amounts in the financial statements have been rounded off to the nearest thousand Khmer Riel ("KHR'000") and dollar for KHR and US\$ amounts, respectively.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.6 Financial instruments

Financial assets and financial liabilities are recognised on the statement of financial position when the Company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

i. Financial assets

All financial assets are recognised and de-recognised on a trade date basis where the purchase or sale of financial assets is under a contract whose terms require delivery of assets within the time frame established by the market concerned.

All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

a. Classification of financial assets

Debt instruments that meet the following conditions are subsequently measured at amortised cost:

- the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding ("SPPI").

Debt instruments that meet the following conditions are subsequently measured at fair value through other comprehensive income ("FVTOCI"):

- the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling the financial assets; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are SPPI.

By default, all other financial assets are subsequently measured at fair value through profit or loss ("FVTPL").

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.6 Financial instruments (continued)

- i. Financial assets (continued)
- a. Classification of financial assets (continued)

Despite the foregoing, the Company may make the following irrevocable election/designation at initial recognition of a financial asset:

- the Company may irrevocably elect to present subsequent changes in fair value of an equity investment in other comprehensive income if certain criteria are met; and
- the Company may irrevocably designate a debt investment that meets the amortised cost or FVTOCI criteria as measured at FVTPL if doing so eliminates or significantly reduces an accounting mismatch.

Debt instruments at amortised cost or at FVTOCI

The Company assesses the classification and measurement of a financial asset based on the contractual cash flow characteristics of the asset and the Company's business model for managing the asset.

For an asset to be classified and measured at amortised cost or at FVTOCI, its contractual terms should give rise to cash flows that are SPPI.

For the purpose of SPPI test, principal is the fair value of the financial asset at initial recognition. That principal amount may change over the life of the financial asset (e.g. if there are repayments of principal). Interest consists of consideration for the time value of money, for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs, as well as a profit margin. The SPPI assessment is made in the currency in which the financial asset is denominated.

Contractual cash flows that are SPPI are consistent with a basic lending arrangement. Contractual terms that introduce exposure to risks or volatility in the contractual cash flows that are unrelated to a basic lending arrangement, such as exposure to changes in equity prices or commodity prices, do not give rise to contractual cash flows that are SPPI. An originated or an acquired financial asset can be a basic lending arrangement irrespective of whether it is a loan in its legal form.

An assessment of business models for managing financial assets is fundamental to the classification of a financial asset. The Company determines the business models at a level that reflects how groups of financial assets are managed together to achieve a particular business objective. The Company's business model does not depend on management's intentions for an individual instrument, therefore the business model assessment is performed at a higher level of aggregation rather than on an instrument-by-instrument basis.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.6 Financial instruments (continued)

- i. Financial assets (continued)
- a. Classification of financial assets (continued)

The Company considers all relevant information available when making the business model assessment. However this assessment is not performed on the basis of scenarios that the Company does not reasonably expect to occur, such as so-called 'worst case' or 'stress case' scenarios. The Company takes into account all relevant evidence available such as:

- how the performance of the business model and the financial assets held within that business model are evaluated and reported to the entity's key management personnel;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way in which those risks are managed; and
- how managers of the business are compensated (e.g. whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected).

At initial recognition of a financial asset, the Company determines whether newly recognised financial assets are part of an existing business model or whether they reflect the commencement of a new business model. The Company reassess its business models at each reporting period to determine whether the business models have changed since the preceding period. For the current and prior reporting period the Company has not identified a change in its business models.

When a debt instrument measured at FVTOCI is derecognised, the cumulative gain/loss previously recognised in OCI is reclassified from equity to profit or loss. In contrast, for an equity investment designated as measured at FVTOCI, the cumulative gain/loss previously recognised in OCI is not subsequently reclassified to profit or loss but transferred within equity.

Debt instruments that are subsequently measured at amortised cost or at FVTOCI are subject to impairment.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.6 Financial instruments (continued)

- i. Financial assets (continued)
- a. Classification of financial assets (continued)

Equity instruments designated as at FVTOCI

On initial recognition, the Company may make an irrevocable election (on an instrument-by-instrument basis) to designate investments in equity instruments as at FVTOCI. Designation at FVTOCI is not permitted if the equity investment is held for trading or if it is contingent consideration recognised by an acquirer in a business combination to which CIFRS 3 applies.

A financial asset is held for trading if:

- it has been acquired principally for the purpose of selling it in the near term; or
- on initial recognition it is part of a portfolio of identified financial instruments that the Company manages together and has evidence of a recent actual pattern of shortterm profit-taking; or
- it is a derivative (except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument).

Investments in equity instruments at FVTOCI are initially measured at fair value plus transaction costs. Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the investments revaluation reserve. The cumulative gain or loss will not be reclassified to profit or loss on disposal of the equity investments, instead, they will be transferred to retained earnings.

The Company has designated all investments in equity instruments that are not held for trading as at FVTOCI on initial application of CIFRS 9.

Dividends on these investments in equity instruments are recognised in profit or loss in accordance with CIFRS 9 unless the dividends clearly represent a recovery of part of the cost of the investment.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.6 Financial instruments (continued)

- i. Financial assets (continued)
- a. Classification of financial assets (continued)

Financial assets at FVTPL

Financial assets that do not meet the criteria for being measured at amortised cost or FVTOCI are measured at FVTPL. Specifically:

- Investments in equity instruments are classified as at FVTPL, unless the Company designates an equity investment that is neither held for trading nor a contingent consideration arising from a business combination as at FVTOCI on initial recognition.
- Debt instruments that do not meet the amortised cost criteria or the FVTOCI criteria are classified as at FVTPL. In addition, debt instruments that meet either the amortised cost criteria or the FVTOCI criteria may be designated as at FVTPL upon initial recognition if such designation eliminates or significantly reduces a measurement or recognition inconsistency that would arise from measuring assets or liabilities or recognising the gains and losses on them on different bases. The Company has not designated any debt instruments as at FVTPL.

Reclassification

If the business model under which the Company holds financial assets changes, the financial assets affected are reclassified. The classification and measurement requirements related to the new category apply prospectively from the first day of the first reporting period following the change in business model that results in reclassifying the Company's financial assets. During the current financial year and previous accounting period there was no change in the business model under which the Company holds financial assets and therefore no reclassifications were made.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.6 Financial instruments (continued)

- i. Financial assets (continued)
- b. Foreign exchange gains and losses

The carrying amount of financial assets that are denominated in a foreign currency is determined in that foreign currency and translated at the spot rate as at each reporting date. Specifically,

- for financial assets measured at amortised cost that are not part of a designated hedging relationship, exchange differences are recognised in profit or loss in the "other income" line item;
- for debt instruments measured at FVTOCI that are not part of a designated hedging relationship, exchange differences on the amortised cost of the debt instrument are recognised in profit or loss in the "other gains and losses" line item;
- for financial assets measured at FVTPL that are not part of a designated hedging relationship, exchange differences are recognised in profit or loss in the "other gains and losses" line item; and
- for equity instruments measured at FVTOCI, exchange differences are recognised in other comprehensive income in the investments revaluation reserve.
- c. Impairment of financial assets

The Company recognises loss allowances for ECLs on the following financial instruments that are not measured at FVTPL:

- loans to customers; and
- balances with other banks.

No impairment loss is required for equity investments measured at FVTOCI.

With the exception of purchased or originated credit-impaired (POCI) financial assets, ECLs are required to be measured through a loss allowance at an amount equal to:

- 12-month ECL, i.e. lifetime ECL that result from those default events on the financial instrument that are possible within 12 months after the reporting date, (referred to as Stage 1); or
- full lifetime ECL, i.e. lifetime ECL that result from all possible default events over the life of the financial instrument, (referred to as Stage 2 and Stage 3).

A loss allowance for full lifetime ECL is required for a financial instrument if the credit risk on that financial instrument has increased significantly since initial recognition. For all other financial instruments, ECLs are measured at an amount equal to the 12-month ECL. More details on the determination of a significant increase in credit risk are provided in Note 2.6.i.c.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.6 Financial instruments (continued)

- i. Financial assets (continued)
- c. Impairment of financial assets (continued)

ECLs are a probability-weighted estimate of the present value of credit losses. These are measured as the present value of the difference between the cash flows due to the Company under the contract and the cash flows that the Company expects to receive arising from the weighting of multiple future economic scenarios, discounted at the asset's EIR.

The Company measures ECL on an individual basis, or on a collective basis for portfolios of loans that share similar economic risk characteristics. The measurement of the loss allowance is based on the present value of the asset's expected cash flows using the asset's original EIR, regardless of whether it is measured on an individual basis or a collective basis.

Credit-impaired financial assets

A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred. Credit-impaired financial assets are referred to as Stage 3 assets. Evidence of credit-impairment includes observable data about the following events:

- significant financial difficulty of the borrower or issuer;
- a breach of contract such as a default or past due event;
- the lender of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession that the lender would not otherwise consider;
- the disappearance of an active market for a security because of financial difficulties;
 or
- the purchase of a financial asset at a deep discount that reflects the incurred credit losses.

It may not be possible to identify a single discrete event—instead, the combined effect of several events may have caused financial assets to become credit-impaired. The Company assesses whether debt instruments that are financial assets measured at amortised cost or FVTOCI are credit-impaired at each reporting date. To assess if corporate debt instruments are credit impaired, the Company considers factors such as bond yields, credit ratings and the ability of the borrower to raise funding.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.6 Financial instruments (continued)

- i. Financial assets (continued)
- c. Impairment of financial assets (continued)

A loan is considered credit-impaired when a concession is granted to the borrower due to a deterioration in the borrower's financial condition, unless there is evidence that as a result of granting the concession the risk of not receiving the contractual cash flows has reduced significantly and there are no other indicators of impairment. For financial assets where concessions are contemplated but not granted the asset is deemed credit impaired when there is observable evidence of credit-impairment including meeting the definition of default. The definition of default (see below) includes unlikeliness to pay indicators and a back-stop if amounts are overdue for 90 days or more.

Definition of default

Critical to the determination of ECL is the definition of default. The definition of default is used in measuring the amount of ECL and in the determination of whether the loss allowance is based on 12-month or lifetime ECL, as default is a component of the probability of default (PD) which affects both the measurement of ECLs and the identification of a significant increase in credit risk (see Note 2.6.i.c).

The Company considers the following as constituting an event of default:

- the borrower is past due equal to or more than 90 days on any material credit obligation to the Company; or
- the borrower is unlikely to pay its credit obligations to the Company in full.

This definition of default is used by the Company for accounting purposes as well as for internal credit risk management purposes and is broadly aligned to the regulatory definition of default. The definition of default is appropriately tailored to reflect different characteristics of different types of assets. Overdrafts are considered as being past due once the customer has breached an advised limit or has been advised of a limit smaller than the current amount outstanding.

When assessing if the borrower is unlikely to pay its credit obligation, the Company takes into account both qualitative and quantitative indicators. Quantitative indicators, such as overdue status and non-payment on another obligation of the same counterparty are key inputs in this analysis. The Company uses a variety of sources of information to assess default which are either developed internally or obtained from external sources. As noted in the definition of credit impaired financial assets above, default is evidence that an asset is credit impaired. Therefore credit impaired assets will include defaulted assets, but will also include other non-defaulted given the definition of credit impaired is broader than the definition of default.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.6 Financial instruments (continued)

- i. Financial assets (continued)
- c. Impairment of financial assets (continued)

Significant increase in credit risk

The Company monitors all financial assets and issued loan commitments that are subject to the impairment requirements to assess whether there has been a significant increase in credit risk since initial recognition. If there has been a significant increase in credit risk the Company will measure the loss allowance based on lifetime rather than 12-month ECL. The Company's accounting policy is not to use the practical expedient that financial assets with 'low' credit risk at the reporting date are deemed not to have had a significant increase in credit risk. As a result the Company monitors all financial assets and issued loan commitments that are subject to impairment for significant increase in credit risk.

In assessing whether the credit risk on a financial instrument has increased significantly since initial recognition, the Company compares the risk of a default occurring on the financial instrument at the reporting date based on the remaining maturity of the instrument with the risk of a default occurring that was anticipated for the remaining maturity at the current reporting date when the financial instrument was first recognised. In making this assessment, the Company considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort, based on the Company's historical experience and expert credit assessment including forward-looking information.

Multiple economic scenarios form the basis of determining the probability of default at initial recognition and at subsequent reporting dates. Different economic scenarios will lead to a different probability of default. It is the weighting of these different scenarios that forms the basis of a weighted average probability of default that is used to determine whether credit risk has significantly increased.

Forward-looking information includes the future prospects of the industries in which the Company's counterparties operate, obtained from economic expert reports, financial analysts, governmental bodies, and other similar organisations, as well as consideration of various internal and external sources of actual and forecast economic information, particularly for regions with a concentration to certain industries, as well as internally generated information of customer payment behaviour. The Company allocates its counterparties to a relevant internal credit risk grade depending on their credit quality. The quantitative information is a primary indicator of significant increase in credit risk and is based on the change in lifetime PD by comparing:

- the remaining lifetime PD at the reporting date; with
- the remaining lifetime PD for this point in time that was estimated based on facts and circumstances at the time of initial recognition of the exposure.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.6 Financial instruments (continued)

- i. Financial assets (continued)
- c. Impairment of financial assets (continued)

The PDs used are forward-looking and the Company uses the same methodologies and data used to measure the loss allowance for ECL.

The qualitative factors that indicate significant increase in credit risk are reflected in PD models on a timely basis. However the Company still considers separately some qualitative factors to assess if credit risk has increased significantly.

Given that a significant increase in credit risk since initial recognition is a relative measure, a change, in absolute terms, in the PD will be more significant for a financial instrument with a lower initial PD than compared to a financial instrument with a higher PD.

As a back-stop when an asset becomes 30 days past due, the Company considers that a significant increase in credit risk has occurred and the asset is in stage 2 of the impairment model, i.e. the loss allowance is measured as the lifetime ECL. In addition loans that are individually assessed and are included on a watch list are in stage 2 of the impairment model. As noted, if there is evidence of credit-impairment the assets are at stage 3 of the impairment model.

Modification and derecognition of financial assets

A modification of a financial asset occurs when the contractual terms governing the cash flows of a financial asset are renegotiated or otherwise modified between initial recognition and maturity of the financial asset. A modification affects the amount and/or timing of the contractual cash flows either immediately or at a future date. In addition, the introduction or adjustment of existing covenants of an existing loan would constitute a modification even if these new or adjusted covenants do not yet affect the cash flows immediately but may affect the cash flows depending on whether the covenant is or is not met (e.g. a change to the increase in the interest rate that arises when covenants are breached).

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.6 Financial instruments (continued)

- i. Financial assets (continued)
- c. Impairment of financial assets (continued)

The Company derecognises a financial asset only when the contractual rights to the asset's cash flows expire (including expiry arising from a modification with substantially different terms), or when the financial asset and substantially all the risks and rewards of ownership of the asset are transferred to another entity. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain/loss that had been recognised in OCI and accumulated in equity is recognised in profit or loss, with the exception of equity investment designated as measured at FVTOCI, where the cumulative gain/loss previously recognised in OCI is not subsequently reclassified to profit or loss.

On derecognition of a financial asset other than in its entirety (e.g. when the Company retains an option to repurchase part of a transferred asset), the Company allocates the previous carrying amount of the financial asset between the part it continues to recognise under continuing involvement, and the part it no longer recognises on the basis of the relative fair values of those parts on the date of the transfer. The difference between the carrying amount allocated to the part that is no longer recognised and the sum of the consideration received for the part no longer recognised and any cumulative gain/loss allocated to it that had been recognised in OCI is recognised in profit or loss. A cumulative gain/loss that had been recognised in OCI is allocated between the part that continues to be recognised and the part that is no longer recognised on the basis of the relative fair values of those parts. This does not apply for equity investments designated as measured at FVTOCI, as the cumulative gain/loss previously recognised in OCI is not subsequently reclassified to profit or loss.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.6 Financial instruments (continued)

- i. Financial assets (continued)
- c. Impairment of financial assets (continued)

Write-off

Loans and debt securities are written off when the Company has no reasonable expectations of recovering the financial asset (either in its entirety or a portion of it). This is the case when the Company determines that the borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. A write-off constitutes a derecognition event. The Company may apply enforcement activities to financial assets written off. Recoveries resulting from the Company's enforcement activities will result in impairment gains, which will be presented in 'other income' in the statement of profit or loss.

Presentation of allowance for ECL in the statement of financial position

Loss allowances for ECL are presented in the statement of financial position as follows:

- for financial assets measured at amortised cost: as a deduction from the gross carrying amount of the assets; and
- where a financial instrument includes both a drawn and an undrawn component, and the Company cannot identify the ECL on the loan commitment component separately from those on the drawn component: the Company presents a combined loss allowance for both components. The combined amount is presented as a deduction from the gross carrying amount of the drawn component. Any excess of the loss allowance over the gross amount of the drawn component is presented as a provision.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.6 Financial instruments (continued)

ii. Financial liabilities and equity

Debt and equity instruments that are issued are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangement.

A financial liability is a contractual obligation to deliver cash or another financial asset or to exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavourable to the Company or a contract that will or may be settled in the Company's own equity instruments and is a non-derivative contract for which the Company is or may be obliged to deliver a variable number of its own equity instruments, or a derivative contract over own equity that will or may be settled other than by the exchange of a fixed amount of cash (or another financial asset) for a fixed number of the Company's own equity instruments.

All financial liabilities are measured subsequently at amortised cost using the effective interest method. For all financial liabilities, the amount presented on the statement of financial position represent all amounts payable including interest element.

Other financial liabilities, including deposits and borrowings, are initially measured at fair value, net of transaction costs. Other financial liabilities are subsequently measured at amortised cost using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The EIR is the rate that exactly discounts estimated future cash payments through the expected life of the financial liability, or, where appropriate, a shorter period, to the net carrying amount on initial recognition. For details on EIR see the "net interest income" in Note 2.15.

iii. Offsetting arrangements

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when the Company has a legally enforceable right to set off the recognised amounts; and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously. A right to set-off must be available today rather than being contingent on a future event and must be exercisable by any of the counterparties, both in the normal course of business and in the event of default, insolvency or bankruptcy.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.7 Regulatory reserves

The National Bank of Cambodia ("NBC") issued the Prakas No. B7-017-344, dated on 1 December 2017, on Credit Risk Grading and Impairment Provisioning, and Circular No. B7-018-001, dated 16 February 2018 on the Implementation of Prakas on Credit Risk Grading and Impairment Provisioning, which requires banks and financial institutions to provide impairment provisioning for short-term and long-term facilities as follows:

Classification	Number of p	ast due days	Allowance
	Short-term	Long-term	
	(one year or less)	(more than one year)	
General allowance:			
Normal	14 days or less	Less than 30 days	1%
Specific allowance:			
Special mention	15 days - 30 days	30 days - 89 days	3%
Substandard	31 days - 60 days	90 days - 179 days	20%
Doubtful	61 days - 90 days	180 days - 359 days	50%
Loss	91 days or more	360 days or more	100%

Facilities under this Prakas is defined as all loans and other financial products, whether reported on the statement of financial position or off-the statement of financial position, provided by the Company to a counterparty, which give rise to credit risk exposure on the Company.

The Company calculates the impairment loss allowance for credit facilities in accordance with the regulatory provision simultaneously with the calculation in accordance with the CIFRSs. The impairment loss allowance calculated in accordance with CIFRSs is to be recognised and recorded in profit or loss and statement of financial position. When the impairment loss allowance calculated in accordance with regulatory provision is higher than that calculated under the CIFRSs, the excess amount is transferred from retained earnings to regulatory reserves as disclosed in Note 22.

Reversal of regulatory reserves

When the impairment loss allowance calculated in accordance with regulatory provision is subsequently less than that calculated under the CIFRSs, the regulatory reserve is reversed at the amount that does not exceed the amount that would have been determined had no regulatory reserve been recognised in prior years.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.8 Leases

(a) The Company as a lessee

Applying practical expedient in CIFRS 1, the Company does not assess whether a contract existing as at 1 January 2018, the date of transition to CIFRSs, contains a lease. For leases after the date of transition, the Company assesses whether a contract is or contains a lease at inception of the contract.

The Company recognises a right-of-use asset and a corresponding lease liability with respect to all lease arrangements in which it is the lessee, except for short-term leases (defined as leases with a lease term of 12 months or less) and leases of low value assets (such as tablets, motorbikes, and small items of office furniture). For these leases, the Company recognises the lease payments as an operating expense on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased assets are consumed.

For leases existing at the date of transition to CIFRSs, a lease liability is measured at the present value of the lease payments that are not paid at the date of transition, discounted using the its incremental borrowing rate at the date of transition. For leases after the date of transition, the lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted by using the rate implicit in the lease. If this rate cannot be readily determined, the Company uses its incremental borrowing rate.

Lease payments included in the measurement of the lease liability comprise:

- Fixed lease payments (including in-substance fixed payments), less any lease incentives receivable;
- Variable lease payments that depend on an index or rate, initially measured using the index or rate at the commencement date;
- The amount expected to be payable by the lessee under residual value guarantees;
- The exercise price of purchase options, if the lessee is reasonably certain to exercise the options; and
- Payments of penalties for terminating the lease, if the lease term reflects the exercise of an option to terminate the lease.

The lease liability is presented as a separate line in the statement of financial position.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect the lease payments made.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.8 Leases (continued)

The Company remeasures the lease liability (and makes a corresponding adjustment to the related right-of-use asset) whenever:

- The lease term has changed or there is a significant event or change in circumstances resulting in a change in the assessment of exercise of a purchase option, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate.
- The lease payments change due to changes in an index or rate or a change in expected payment under a guaranteed residual value, in which cases the lease liability is remeasured by discounting the revised lease payments using an unchanged discount rate (unless the lease payments change is due to a change in a floating interest rate, in which case a revised discount rate is used).
- A lease contract is modified and the lease modification is not accounted for as a separate lease, in which case the lease liability is remeasured based on the lease term of the modified lease by discounting the revised lease payments using a revised discount rate at the effective date of the modification.

The Company did not make any such adjustments during the periods presented.

The right-of-use assets comprise the initial measurement of the corresponding lease liability, lease payments made at or before the commencement day, less any lease incentives received and any initial direct costs. They are subsequently measured at cost less accumulated depreciation and impairment losses.

Whenever the Company incurs an obligation for costs to dismantle and remove a leased asset, restore the site on which it is located or restore the underlying asset to the condition required by the terms and conditions of the lease, a provision is recognised and measured under CIAS 37. To the extent that the costs relate to a right-of-use asset, the costs are included in the related right-of-use asset, unless those costs are incurred to produce inventories.

Right-of-use assets are depreciated over the period of lease term. If a lease transfers ownership of the underlying asset or the cost of the right-of-use asset reflects that the Company expects to exercise a purchase option, the related right-of-use asset is depreciated over the useful life of the underlying asset. The depreciation starts at the commencement date of the lease.

The right-of-use assets are presented as a separate line in the statement of financial position.

The Company applies CIAS 36 to determine whether a right-of-use asset is impaired and accounts for any identified impairment loss as described in the 'Property and Equipment' policy.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.9 Property and equipment

Property and equipment are stated at cost less accumulated depreciation and impairment losses, if any. The cost of a property and equipment item comprises its purchase price and any directly attributable costs of bringing the asset to its working condition and location for its intended use. Where an item of property and equipment comprises major components having different estimated useful lives, the components are accounted for as separate items of property and equipment.

Subsequent expenditure relating to an item of property and equipment that has already been recognised is added to the carrying amount of the asset when it is probable that future economic benefits, in excess of the originally assessed standard of performance of the existing asset, will flow to the Company. All other subsequent expenditure is recognised as an expense in the period in which it is incurred.

Gain or loss arising from the retirement or disposal of an item of property and equipment is determined as the difference between the estimated net disposal proceeds and the carrying amount of the assets and is recognised in profit or loss on the date of retirement or disposal.

Depreciation is calculated on a straight-line basis over the estimated useful life of the assets as follows:

Leasehold improvements 4 years
Motor vehicles 8 years
Motorcycles 5 years
Computer and office equipment 3 to 4 years

Construction in progress is not depreciated until such time as the relevant assets are completed and put into operational use.

Fully depreciated assets are retained in the financial statements until they are no longer in use and no further charge for depreciation is made in respect of these assets. If there is any indication that there has been a significant change in rate, useful life or residual value of an asset, the depreciation of that asset is revised prospectively to reflect the new expectations.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.10 Software

Software is stated at cost less accumulated amortisation and accumulated impairment losses, if any. It is amortised on a straight-line basis at the rate of 20% per annum. If there is an indication that there has been a significant change in amortisation rate, useful life or residual value of software, the amortisation is revised prospectively to reflect the new expectations.

Work in progress is not depreciated until such time as the relevant assets are completed and put into operational use.

2.11 Impairment of non-financial assets

Impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs to sell and its value in use. The fair value less costs to sell calculation is based on available data from binding sales transactions in an arm's length transaction of similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a discounted cash flow model. The cash flows are derived from the budget and do not include restructuring activities that the Company is not yet committed to or significant future investments that will enhance the asset's performance of the cash generating unit being tested. The recoverable amount is most sensitive to the discount rate used for the discounted cash flow model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes.

Any impairment loss is charged to income statement in the year in which it arises. Reversal of impairment loss is recognised in the income statement to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation and amortisation, had no impairment loss been recognised.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.12 Investments in associates

An associate is an entity over which the Company has significant influence and that is neither a subsidiary nor an interest in a joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

The results and assets and liabilities of associates are incorporated in these financial statements using the equity method of accounting.

Under the equity method, an investment in an associate is recognised initially in the statement of financial position at cost and adjusted thereafter to recognise the Company's share of the profit or loss and other comprehensive income of the associate. When the Company's share of losses of an associate exceeds the Company's interest in that associate (which includes any long-term interests that, in substance, form part of the Company's net investment in the associate), the Company discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Company has incurred legal or constructive obligations or made payments on behalf of the associate.

An investment in an associate is accounted for using the equity method from the date on which the investee becomes an associate. On acquisition of the investment in an associate, any excess of the cost of the investment over the Company's share of the net fair value of the identifiable assets and liabilities of the investee is recognised as goodwill, which is included within the carrying amount of the investment. Any excess of the Company's share of the net fair value of the identifiable assets and liabilities over the cost of the investment, after reassessment, is recognised immediately in profit or loss in the period in which the investment is acquired.

2.13 Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made on the amount of the obligation.

When there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is recognised as interest expense.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.14 Employee benefits

Provision for staff pension fund

The Company provides its employees with benefits under the staff pension fund policy. Employees who complete three months of service with the Company have to participate in the staff pension fund scheme. The fund is sourced from the following:

Employees contribute 3% of their monthly salary, and the Company contributes 6% for employees who are working less than or equal to three years, and 7% for employees working in the Company for over three years. The Company's contribution is charged to the income statement on accrual basis.

The Company contributes interest on the cumulative balance of the staff pension fund in line with the market rates the Company provides to depositors. This interest is charged to the income statement on accrual basis.

The staff pension fund will be paid to employees (who have contributed to the fund) upon their retirement, resignation or termination of employment. The employee's contribution and interest are paid in full accordingly. Those who have been terminated due to serious misconduct are only entitled to their contribution plus interest, regardless of how long they have been employed by the Company.

Seniority payment

The Minister of Labour and Vocational Training (MoLVT) issued a Prakas No. 443 on Seniority Payment dated 21 September 2018 and Directive No. 042/19 on the Back Pay of Seniority Payment Before 2019 for the Enterprise and Institution Beside Textile, Garment and Footwear Sector dated 22 March 2019, requiring the Company to pay past seniority payment to employees with undetermined duration contract. All employees who have been working before 1 January 2019 and continue to work are entitled to a payment of six (6) days of their average wages of each year of service, totalling not exceeding 6 months, and shall be paid every year starting December 2021 as follows:

- 3 days shall be made in June; and
- 3 days shall be made in December of each year.

Employees are not entitled to the remaining past seniority payment upon resignation or termination due to serious misconduct.

The past seniority payment benefit is measured at the present value of the estimated future cash outflows expected to be made by the Company in respect of services provided by employees up to 31 December 2018. This benefit was recognised in full during the year 2018.

This Prakas also requires the Company to pay its employees the seniority for the employment service from 2019 amounting to 15 days per annum of their wages and other benefits, 7.5 days of which shall be paid in June and in December of each year. This seniority was recognised during the employees' periods of service on accrual basis.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.14 Employee benefits (continued)

Employee leave entitlements

Employee entitlements to annual leave are recognised when they accrue to employees. A provision is made for the estimated liability for annual leave as a result of services rendered by employees up to the end of the reporting period.

2.15 Net interest income

Interest income and expense for all financial instruments except for those classified as held for trading or those measured or designated as at FVTPL are recognised in 'Net interest income' as 'Interest income' and 'Interest expense' in the profit or loss account using the effective interest method. Interest on financial instruments measured as at FVTPL is included within the fair value movement during the period.

The effective interest rate (EIR) is the rate that exactly discounts estimated future cash flows of the financial instrument through the expected life of the financial instrument or, where appropriate, a shorter period, to the net carrying amount of the financial asset or financial liability. The future cash flows are estimated taking into account all the contractual terms of the instrument.

The calculation of the EIR includes all fees paid or received between parties to the contract that are incremental and directly attributable to the specific lending arrangement, transaction costs, and all other premiums or discounts. For financial assets at FVTPL transaction costs are recognised in profit or loss at initial recognition.

The interest income/interest expense is calculated by applying the EIR to the gross carrying amount of non-credit impaired financial assets (i.e. at the amortised cost of the financial asset before adjusting for any expected credit loss allowance), or to the amortised cost of financial liabilities. For credit-impaired financial assets, the interest income is calculated by applying the EIR to the amortised cost of the credit-impaired financial assets (i.e. the gross carrying amount less the allowance for expected credit losses (ECLs)).

2.16 Other income and expense

Other income and expense include fees other than those that are an integral part of EIR (see above). The fees included in this part of the Company's statement of profit or loss include a diverse range of services it provides to its customers such as fees charged for servicing a loan.

Fee and commission expenses with regards to services are accounted for as the services are received.

2.17 Grant income

Grants received from third parties to subsidise the Company's operating expenses are released to the statement of profit or loss on a systematic and rational basis, matching the related costs which they are intended to compensate.

Grants received from third parties for the purchase of property and equipment are amortised to the statement of profit or loss on a systematic and rational basis over the useful life of the assets. The unamortised grants are shown as deferred grant income.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.18 Income tax

Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from net profit as reported in profit or loss because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Company's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

A provision is recognised for those matters for which the tax determination is uncertain but it is considered probable that there will be a future outflow of funds to a tax authority. The provisions are measured at the best estimate of the amount expected to become payable. The assessment is based on the judgement of tax professionals within the Company supported by previous experience in respect of such activities and in certain cases based on specialist independent tax advice.

Deferred tax

Deferred tax is the tax expected to be payable or recoverable on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit, and is accounted for using the liability method. Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from the initial recognition of goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised based on tax laws and rates that have been enacted or substantively enacted at the reporting date.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

3. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In applying the Company's accounting policies, the directors are required to make judgements (other than those involving estimations) that have a significant impact on the amounts recognised and to make estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

3.1 Critical judgments in applying accounting policies

The following are the critical judgements, apart from those involving estimations (which are presented separately below), that the Directors have made in the process of applying the Company's accounting policies and that have the most significant effect on the amounts recognised in financial statements.

(i) Functional currency

Based on the economic substance of underlying circumstances relevant to the Company, Management determines the functional currency of the Company to be the KHR. The KHR is the currency of the primary economic environment in which the Company operates and it is the currency that mainly influences the loans to customers and interest income.

(ii) Significant influence over its associate, Forte Life Assurance (Cambodia) Plc.

Forte Life Assurance (Cambodia) Plc. is an associate of the Company although the Company only owns a 5.7% ownership interest in Forte Life Assurance (Cambodia) Plc. (Note 11). The Company has significant influence over Forte Life Assurance (Cambodia) Plc. by virtue of its contractual right to appoint two out of six directors to the board of directors of that company.

(iii) Business model assessment

Classification and measurement of financial assets depends on the results of the SPPI and the business model test. The Company determines the business model at a level that reflects how groups of financial assets are managed together to achieve a particular business objective. This assessment includes judgement reflecting all relevant evidence including how the performance of the assets is evaluated and their performance is measured, the risks that affect the performance of the assets and how these are managed. The Company monitors financial assets measured at amortised cost or fair value through other comprehensive income that are derecognised prior to their maturity to understand the reason for their disposal and whether the reasons are consistent with the objective of the business for which the asset was held. Monitoring is part of the Company's continuous assessment of whether the business model for which the remaining financial assets are held continues to be appropriate and if it is not appropriate whether there has been a change in business model and so a prospective change to the classification of those assets.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

3. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY (continued)

3.1 Critical judgments in applying accounting policies (continued)

(iv) Significant increase in credit risk

As explained in Note 2, expected credit losses are measured as an allowance equal to 12-month ECL for stage 1 assets, or lifetime ECL for stage 2 or stage 3 assets. An asset moves to stage 2 when its credit risk has increased significantly since initial recognition. CIFRS 9 does not define what constitutes a significant increase in credit risk. In assessing whether the credit risk of an asset has significantly increased the Company takes into account qualitative and quantitative reasonable and supportable forward looking information.

(v) Establishing groups of assets with similar credit risk characteristics

When ECLs are measured on a collective basis, the financial instruments are grouped on the basis of shared risk characteristics. The Company monitors the appropriateness of the credit risk characteristics on an ongoing basis to assess whether they continue to be similar. This is required in order to ensure that should credit risk characteristics change there is appropriate re-segmentation of the assets. This may result in new portfolios being created or assets moving to an existing portfolio that better reflects the similar credit risk characteristics of that group of assets. Re-segmentation of portfolios and movement between portfolios is more common when there is a significant increase in credit risk (or when that significant increase reverses) and so assets move from 12-month to lifetime ECLs, or vice versa, but it can also occur within portfolios that continue to be measured on the same basis of 12-month or lifetime ECLs but the amount of ECL changes because the credit risk of the portfolios differ.

(vi) Models and assumptions used

The Company uses various models and assumptions in estimating ECL. Judgement is applied in identifying the most appropriate model for each type of asset, as well as for determining the assumptions used in these models, including assumptions that relate to key drivers of credit risk.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

3. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY (continued)

3.2 Key sources of estimation uncertainty

(i) Calculation of loss allowance

When measuring expected credit losses, the Company uses reasonable and supportable forward looking information, which is based on assumptions for the future movement of different economic drivers and how these drivers will affect each other.

Loss given default is an estimate of the loss arising on default. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, taking into account cash flows from collateral and integral credit enhancements.

Probability of default constitutes a key input in measuring ECL. Probability of default is an estimate of the likelihood of default over a given time horizon, the calculation of which includes historical data, assumptions and expectations of future conditions.

(ii) Income tax

The taxation system in Cambodia is characterised by numerous taxes and frequently changing legislation, which is often unclear, contradictory and subject to interpretation. Taxes are subject to review and investigation by a number of authorities, which are empowered by law to impose fines, penalties and interest charges.

These factors may create potential tax exposures for the Company. Directors believe that they have understood relevant tax regulations and adequately provided for tax liabilities based on their interpretation of the current tax legislation. However, where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

(iii) Useful lives and residual value of property and equipment and software

The useful life and residual value of each item of property and equipment and software are estimated based on the period over which the asset is expected to be available for use. Such estimation is based on a collective assessment of similar businesses, internal technical evaluation and experience with similar assets. The estimated useful life of each asset is reviewed periodically and updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the asset. It is possible, however, that future results of operations could be materially affected by changes in the amounts and timing of recorded expenses brought about by changes in the factors mentioned above. A reduction in the estimated useful life or change in residual value of any item of property and equipment would increase the recorded operating expenses and decrease the carrying value of these non-financial assets. There is no change in the estimated useful lives of property and equipment and software during the year.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

3. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY (continued)

3.2 Key sources of estimation uncertainty (continued)

(iv) Impairment of non-financial assets

Impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs to sell and its value in use. The fair value less costs to sell calculation is based on available data from binding sales transactions in an arm's length transaction of similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a discounted cash flow model. The cash flows are derived from the budget and do not include restructuring activities that the Company is not yet committed to or significant future investments that will enhance the asset's performance of the cash generating unit being tested. The recoverable amount is most sensitive to the discount rate used for the discounted cash flow model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

5. BALANCES WITH THE NBC (continued)

(i) Under NBC Prakas No. B7-07-163 on Licensing of Microfinance Deposit Taking Institutions dated 13 December 2007, the Company is required to maintain a capital guarantee deposit equivalent to 10% of registered capital with the NBC. This deposit is not available for use in the Company's day-to-day operations but is refundable when the Company voluntarily ceases to operate the business in Cambodia.

The statutory deposit on registered capital placed with the NBC earns interest at the rate of 3% (2018: 3%) per annum.

(ii) The NCD amounting to KHR200 million is used as collateral against the overdraft facility with the NBC in connection with the Fast and Secure Transfer ("FAST") service. The FAST service provides instant Riel-denominated fund transfers between banking institutions. The overdraft line as at 31 December 2019 is unutilised. NCD amounting to KHR132.74 Billion (2018: KHR74.90 billion) is used as collateral (for currency hedge purpose) against the borrowing from the NBC.

The above NCD earned interest ranging from 0.60% to 1.08% per annum (2018: 0.72% - 1% per annum).

(iii) The reserve requirement represents the minimum reserve requirement which is calculated at 8% of the total deposits from customers as required by NBC Prakas B7-07-163 on Licensing of MDIs. The reserve requirement fluctuates depending on the level of deposits from customers and does not earn interest.

No impairment loss allowance is created against the balance with the NBC as management determines that the credit risk on these facilities are minimal.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

10. LEASES (continued)

The Company leases several assets including buildings, automated teller machines (ATM), and parking lot. The average lease term is 5 years (2018: 5 years).

The Company has options to purchase ATM for a nominal amount at the end of the lease term.

Approximately one fifth of the leases for buildings expired in the current financial year. The expired contracts were replaced by new leases for identical underlying assets. This resulted in additions to right-of-use assets of KHR2,999,629 in 2019 (2018: KHR4,996,984).

The maturity analysis of lease liabilities is presented in Note 14.

When measuring lease liabilities for leases that were classified as operating leases, the Company discounted lease payments using its incremental borrowing rate and the weighted-average rate applied is 7.81%.

(ii) Amounts recognised in profit or loss

_	Year e 31 Decem		Year ended 31 December 2018	
-	KHR'000	US\$	KHR'000	US\$

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

13. INCOME TAX

The Company's tax returns are subject to examination by the General Department of Taxation ("GDT"). Because the application of tax laws and regulations to many types of transactions is susceptible to varying interpretations, the amounts reported in the financial statements could change at a later date upon final determination by the GDT.

13.1 Income tax expense

In accordance with Cambodian tax law, the Company has the obligation to pay tax on profit ("ToP") at the rate of 20% of taxable income or minimum tax at 1% of turnover inclusive of all taxes except value-added tax, whichever is higher.

Income tax expense comprises:

	Year e		Year e 31 Decemb	
	KHR'000	US\$	KHR'000	US\$
Current income tax Deferred tax income Under provision of income tax in	12,276,847 (4,546,173)	3,029,824 (1,121,958)	8,595,430 (100,345)	2,124,952 (24,807)
prior year(*)	935,736	230,932		
	8,666,410	2,138,798	8,495,085	2,100,145

The General Department of Taxation (the "GDT") conducted and completed its tax comprehensive audit on the Company's accounts for the financial years 2009 to 2017 and the Company received the Certificates of Tax Audit Situation for these years. The tax liabilities resulting from such comprehensive tax audits was fully settled during the year.

The reconciliation of income tax expense shown in profit or loss is as follows:

	Year ei	nded	Year en	ded

35. FINANCIAL RISK MANAGEMENT

The Company's Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The Board of Directors has established the Asset and Liability Management Committee (ALCO), which is responsible for approving and monitoring Company risk management policies.

The Company's risk management policies are established to identify and analyse the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. The risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities.

The policies and procedures adopted by the Company to manage the risks that arise in the conduct of their business activities are as follows:

35.1 Credit risk

Credit risk is the risk that a customer or counterparty will default on its contractual obligations resulting in financial loss to the Company. The Company's main income generating activity is lending to customers and therefore credit risk is a principal risk. Credit risk mainly arises from loans to customers and other banks. The Company considers all elements of credit risk exposure such as counterparty default risk and sector risk for risk management purposes.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

35. FINANCIAL RISK MANAGEMENT (Continued)

35.1 Credit risk (Continued)

(a) Credit risk management

The Company's credit committee is responsible for managing the Company's credit risk by:

- Ensuring that the Company has appropriate credit risk practices, including an effective system of internal control, to consistently determine adequate allowances in accordance with the Company's stated policies and procedures, CIFRS and relevant supervisory guidance.
- Identifying, assessing and measuring credit risk across the Company, from an individual instrument to a portfolio level.
- Creating credit policies to protect the Company against the identified risks including the requirements to obtain collateral from borrowers, to perform robust ongoing credit assessment of borrowers and to continually monitor exposures against internal risk limits.
- Limiting concentrations of exposure by type of asset, counterparties, industry, credit rating, geographic location.
- Establishing a robust control framework regarding the authorisation structure for the approval and renewal of credit facilities.
- Developing and maintaining the Company's risk grading to categorise exposures according to the degree of risk of default. Risk grades are subject to regular reviews.
- Developing and maintaining the Company's processes for measuring ECL including monitoring of credit risk, incorporation of forward-looking information and the method used to measure ECL.
- Ensuring that the Company has policies and procedures in place to appropriately maintain and validate models used to assess and measure ECL.
- Establishing a sound credit risk accounting assessment and measurement process
 that provides it with a strong basis for common systems, tools and data to assess
 credit risk and to account for ECL. Providing advice, guidance and specialist skills to
 business units to promote best practice throughout the Company in the management
 of credit risk.

The internal audit function performs regular audits making sure that the established controls and procedures are adequately designed and implemented.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

35. FINANCIAL RISK MANAGEMENT (Continued)

35.1 Credit risk (Continued)

(b) Significant increase in credit risk

As explained in note 2 the Company monitors all financial assets that are subject to impairment requirements to assess whether there has been a significant increase in credit risk since initial recognition. If there has been a significant increase in credit risk, the Company will measure the loss allowance based on lifetime rather than 12-month ECL.

The Company uses credit risk grades as a primary input into the determination of the term structure of the PD for exposures. The Company collects performance and default information about its credit risk exposures analysed by type of product and borrower as well as by credit risk grading. The information used is both internal and external depending on the portfolio assessed. The table below provides a summary of the Company's internal credit risk grades.

No.	Groups rating	PD Range
1	Standard	0.20% - 60%
2	Special mention	0.20% - 60%
3	Substandard	10.90% - 77.80%
4	Doubtful	100%
5	Loss	100%

The Company presumes that the credit risk on a financial asset has increased significantly since initial recognition when contractual payments are more than 30 days past due unless the Company has reasonable and supportable information that demonstrates otherwise.

The Company has monitoring procedures in place to make sure that the criteria used to identify significant increases in credit are effective, meaning that significant increase in credit risk is identified before the exposure is defaulted or when the asset becomes 30 days past due.

The Company has controls and procedures in place to identify when the credit risk of an asset improves and the definition of significant increase in credit risk is no longer met. When this is the case the asset may move back to stage 1 from stage 2, subject to payments being up to date and the ability of the borrower to make future payments on time.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

35. FINANCIAL RISK MANAGEMENT (Continued)

35.1 Credit risk (Continued)

(c) Incorporation of forward-looking information

The Company analysed forward-looking information by using the statistical regression model for assessment to see whether the credit risk of an instrument has increased significantly to the measurement of ECL.

The Company formulates three economic scenarios: a base case, which is the median scenario assigned a 60% probability of occurring, and two less likely scenarios, one upside and one downside, each assigned 20% probability of occurring. The base case is aligned with information used by the Company for other purposes such as strategic planning and budgeting.

External information considered includes economic data and forecasts published by governmental bodies and monetary authorities in the countries where the Company operates, supranational organisations such as International Monetary Fund and world bank.

The Company has identified and documented the key drivers of credit risk and credit losses for each portfolio of financial instruments and, using an analysis of historical data, has estimated relationships between macro-economic variables and credit risk and credit losses.

The key drivers for credit risk on loan portfolios are: Cambodia GDP at Constant 2000 Price, Unemployment, and USD-KHR Exchange Rate.

Based on the forward-looking information analysis, the impact of macro-economic on ECL calculation is insignificant, so the Company decided to incorporate adjustment of forward-looking PD into ECL calculation.

(c) Measurement of ECL

The key inputs used for measuring ECL are:

- probability of default ("PD");
- loss given default ("LGD"); and
- exposure at default ("EAD").

These figures are generally derived from internally developed statistical models and other historical data.

PD is an estimate of the likelihood of default over a given time horizon. It is estimated as at a point in time. The calculation is based on statistical rating models, and assessed using rating tools tailored to the various categories of counterparties and exposures. These statistical models are based on market data (where available), as well as internal data comprising both quantitative and qualitative factors. PDs are estimated considering the contractual maturities of exposures and estimated prepayment rates. The estimation is based on current conditions, adjusted to take into account estimates of future conditions that will impact PD.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

35. FINANCIAL RISK MANAGEMENT (Continued)

35.1 Credit risk (Continued)

(c) Measurement of ECL (Continued)

LGD is an estimate of the loss arising on default. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, taking into account cash flows from any collateral. LGD models for unsecured assets consider time of recovery, recovery rates and seniority of claims. The calculation is on a discounted cash flow basis, where the cash flows are discounted by the original EIR of the loan.

EAD is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest, and expected drawdowns on committed facilities. The Company's modelling approach for EAD reflects expected changes in the balance outstanding over the lifetime of the loan exposure that are permitted by the current contractual terms, such as amortisation profiles, early repayment or overpayment, changes in utilisation of undrawn commitments and credit mitigation actions taken before default. The Company uses EAD models that reflect the characteristics of the portfolios.

The Company measures ECL considering the risk of default over the maximum contractual period over which the entity is exposed to credit risk and not a longer period. However, for financial instruments such as revolving credit facilities that include both a loan and an irrevocable undrawn commitment component, the Company's contractual ability to demand repayment and cancel the undrawn commitment does not limit the Company's exposure to credit losses to the contractual notice period. For such financial instruments, the Company measures ECL over the period that it is exposed to credit risk and ECL would not be mitigated by credit risk management actions, even if that period extends beyond the maximum contractual period. These financial instruments do not have a fixed term or repayment structure and have a short contractual cancellation period. However, the Company does not enforce in the normal day-to-day management of the contractual right to cancel these financial instruments. This is because these financial instruments are managed on a collective basis and are canceled only when the Company becomes aware of an increase in credit risk at the facility level. This longer period is estimated taking into account the credit risk management actions that the Company expects to take to mitigate ECL, e.g. reduction in limits or cancellation of the loan commitment.

The ECL calculation for accounting purposes is different to the ECL calculation for regulatory purposes, although many inputs used are similar. The Company has ensured that the appropriate methodology is used when calculating ECL for both accounting and regulatory purposes. The main differences between the methodologies used to measure ECL in accordance with CIFRS 9 versus the ones applied for regulatory purposes are:

- Percentage of provision by classification based on short/long term loan
- Number of day past due
- Forward looking of macro-economic factor
- Probability of default and historical recovery rate

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

35. FINANCIAL RISK MANAGEMENT (Continued)

35.1 Credit risk (Continued)

(c) Measurement of ECL (Continued)

The measurement of ECL is based on probability weighted average credit loss. As a result, the measurement of the loss allowance should be the same regardless of whether it is measured on an individual basis or a collective basis (although measurement on a collective basis is more practical for large portfolios of items). In relation to the assessment of whether there has been a significant increase in credit risk it can be necessary to perform the assessment on a collective basis as noted below.

(d) Groupings based on shared risks characteristics

AMK has defined four main segments for PD calculation which have similar risk behaviours based on analysis of roll rates, as shown in the table below. These segments are:

Principal Repayment Method	Loan Type	Segment
End of Term	Group	EOT-Group Loan
End of Term	Individual	EOT-Individual Loan
Instalment	Group	Instalment-Group Loan
Instalment	Individual	Instalment-Individual Loan

The groupings are reviewed on a regular basis to ensure that each group is comprised of homogenous exposures.

(f) Credit quality analysis (Continued)

Under the Company's monitoring procedures, a significant increase in credit risk is identified before the exposure has defaulted, and at the latest when the exposure becomes 30 days past due. This is the case mainly for loans to customers. The table below provides an analysis of the gross carrying amount of loans to customers by past due status.

	31 Decen	<u> 1ber 2019</u>	31 Decem	ber 2018	1 January 2018

(g) Collateral held as security and other credit enhancements

The Company holds residential properties as collaterals for majority of loans, and the collaterals include land, house, building and other immovable assets. The Company's policy is to fund up to 70% of the collateral value. There was no change in the Company's collateral policy during the year.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

35. FINANCIAL RISK MANAGEMENT (Continued)

35.2 Market risk

The Company takes on exposure to market risk, which is the risk that the fair value or future cash flow of a financial instrument, will fluctuate because of changes in market prices. Market risk arises from open positions in interest rates and currency and equity products, all of which are exposed to general and specific market movements and changes in the level of volatility of market rates or prices such as interest rates, credit spreads, foreign exchange rates and equity prices.

(i) Market risk management

The Company's market risk management objective is to manage and control market risk exposures in order to optimise return on risk while ensuring solvency.

As with liquidity risk, ALCO is responsible for ensuring the effective management of market risk throughout the Company. Specific levels of authority and responsibility in relation to market risk management have been assigned to appropriate market risk committees.

The core market risk management activities are:

- the identification of all key market risks and their drivers;
- the independent measurement and evaluation key market risks and their drivers;
- the use of results and estimates as the basis for the Company's risk/return-oriented management; and
- monitoring risks and reporting on them.

The Company uses a wide range of quantitative and qualitative tools to manage and monitor market risk. Quantitative limits for fair value and net income sensitivities, stress tests, scenario analyses and ratios on economic capital are used to enforce the Company's market risk appetite. The quantitative and qualitative factors limiting market price risk are determined by the Management ALCO by reference to the Company's management of economic capital. Based on qualitative analyses and quantitative ratios, the market risk function identifies potential future risks, anticipates, in collaboration with the finance function, potential financial losses, and defines proposals for further action, which are discussed with the market units. Risk concentrations are restricted directly with specific limits or are indirectly avoided using the limit structure described above. Market risk reports reflecting the Company's exposures, risk concentrations, stress test results are reviewed on a daily basis. Appropriate actions are taken when needed, including revisiting the market risk management policies and relative limits to ensure that the Company's market risk management objective is met.

The Company also enters into a number of currency swaps to manage its exposure to foreign currency risk.

The Company's exposure to market risk pertains to non-trading portfolios.

There has been no change to the Company's exposure to market risks or the manner in which these risks are managed and measured.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

35.2 Market risk (continued)

(i) Foreign exchange risk

The Company operates in the Kingdom of Cambodia and transacts in US\$, KHR and THB. Foreign exchange risk arises from future commercial transactions and recognised assets and liabilities denominated in a currency that is not the Company's functional currency.

The balances in monetary assets and liabilities denominated in their respective currencies were as follows:

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

35. FINANCIAL RISK MANAGEMENT (Continued)

35.2 Market risk (continued)

(i) Foreign exchange risk (continued)

Currency swap

The Company has 12 foreign exchange swap contracts (2018: 10 contracts) with certain commercial banks outstanding as at 31 December 2019 to exchange KHR currency with US\$ currency in order to manage its foreign exchange risk. As management considers that exposure to foreign exchange risk is deemed minimal, no sensitivity analysis for foreign currency exchange risk was presented.

(ii) Interest rate risk

Cash flow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market interest rates. Interest margins may increase as a result of changes and may reduce losses in the event that unexpected movements arise. The management of the Company, at this stage, does not have a policy to set limits on the level of mismatch of interest rate repricing that may be undertaken; however, management regularly monitors the mismatch.

Interest rate risk arises from the possibility that changes in interest rates will affect future profitability or the fair values of financial instruments. The Company is exposed to interest rate risk as a result of mismatches of interest rate re-pricing of assets and liabilities. The Company manages this risk by matching the re-pricing of assets and liabilities through risk management strategies.

The Company has no significant financial assets and liabilities with floating interest rates. Balances with the NBC and with banks earn fixed interest for the period of the deposit and placement, and loans to customers earn fixed interest based on outstanding balance over the agreed term. Therefore, no sensitivity analysis for interest rate risk was presented.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

35. FINANCIAL RISK MANAGEMENT (Continued)

35.2 Market risk (continued)

(i) Interest rate risk (continued)

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

35. FINANCIAL RISK MANAGEMENT (Continued)

35.3 Liquidity risk

Liquidity risk is the risk that the Company is unable to meet its payment obligations associated with its financial liabilities when they fall due and to replace funds when they are withdrawn. The consequence of this may be the failure to meet obligations to repay depositors and fulfil commitments to lend.

Management monitors liquidity and manages the concentration and profile of debt maturities. Monitoring and reporting take the form of the daily cash position and projection for the next day, week and month, respectively, as these are key periods for liquidity management. Management monitors the movements of the main depositors and projection of their withdrawals.

The following tables present an analysis of the assets and liabilities of the Company by relevant maturity based on the remaining period at the statement of financial position date to the contractual or estimated maturity dates.

The Company performs maturity analysis for financial liabilities that shows the remaining contractual maturities. However, the Company monitors the assets held to manage liquidity risk on a continuous basis and it could obtain temporary fund from the overdraft facilities with other banks anytime it encounters liquidity problem.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

35. FINANCIAL RISK MANAGEMENT (Continued)

35.3 Liquidity risk (continued)

Liquidity reserves

The Company maintains a pool of liquid assets which represents the primary source of liquidity in stress scenarios. Its composition is subject to limits designed to reduce concentration risks which are monitored on an ongoing basis. The Company's liquidity reserves are analysed below:

- (i) This represents currency purchase from NBC through its LPCO mechanism against the NCD.
- (ii) This represents assets that are not pledged but that the Company believes it is restricted from using to secure funding, for legal or other reasons. This includes capital guarantee and reserve requirement.
- (iii) This represents assets that can be used as collateral to access secure funding.
- (iv) This represents assets that are not restricted for use as collateral, but that the Company would not consider readily available to secure funding in the normal course of business.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

35. FINANCIAL RISK MANAGEMENT (Continued)

35.4 Capital risk

Capital risk is the risk that the Company has insufficient capital resources to meet the minimum regulatory requirements to support its credit rating and to support its growth and strategic options.

The Company's strategy is to maintain a strong capital base so as to maintain market confidence and to sustain further development of the business. The impact of the level of capital on shareholders' return is also recognised and the Company recognised the need to maintain a balance between the higher returns that might be possible with greater gearing and advantages and security afforded by a sound capital position.

The Company's lead regulator, the NBC, sets and monitors capital requirements for the Company as a whole.

Capital risk management

As with liquidity and market risks, ALCO is responsible for ensuring the effective management of capital risk throughout the Company.

Capital risk is measured and monitored using limits set calculated in accordance with NBC's requirements.

On 22 February 2018, the NBC issued a Prakas on Capital Buffer in Banking and Financial Institutions. According to Article 22 of this Prakas, the institution shall comply with the provisions related to the capital conservation buffer at least 50% of the conservation buffer by 1 January 2019 and fully comply by 1 January 2020.

On 7 March 2018, the NBC issued a circular on the implementation of Prakas on Capital Buffer in Banking and Financial Institutions, which determines the countercyclical capital buffer at a level of 0% until a new announcement is released.

The Company has complied with all externa<u>lly</u> imposed capital requirements throughout the year.

35.5 Fair value of financial assets and liabilities

Fair value represents the amount at which an asset could be exchanged or a liability settled on an arms-length basis. As verifiable market prices are not available, market prices are not available for a significant proportion of the Company's financial assets and liabilities. Fair values, therefore, have been based on management assumptions according to the profile of the asset and liability base. Management believes that the carrying amounts of the financial assets and liabilities included in the statement of financial position are a reasonable estimation of their fair values. In making this assessment, management assumes that loans to customers are mainly held to maturity with fair values equal to the book value of loans to customers adjusted for provision for loan losses, if any.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

36. CURRENT AND NON-CURRENT

Management presents the financial statements based on liquidity. Information about short-term and long-term of assets and liabilities are disclosed in the financial risk management section. Property and equipment, software, right-of-use assets and deferred tax assets are non-current assets. Current tax liability is current liability and provision for employee benefits are non-current liabilities.

37. NEW AND REVISED CIFRS STANDARDS IN ISSUE BUT NOT YET EFFECTIVE

At the date of authorisation of these financial statements, the Company has not applied the following new and revised CIFRS Standards that have been issued but are not yet effective:

CIFRS 17 Insurance Contracts

CIFRS 10 and CIAS 28 Sale or Contribution of Assets between an Investor

(amendments) and its Associate or Joint Venture

Amendments to CIAS 1 and Definition of material

CIAS 8

Conceptual Framework Amendments to References to the Conceptual

Framework in CIFRS Standards

CIFRS 17 Insurance Contracts

CIFRS 17 establishes the principles for the recognition, measurement, presentation and disclosure of insurance contracts and supersedes CIFRS 4 *Insurance Contracts*.

CIFRS 17 outlines a general model, which is modified for insurance contracts with direct participation features, described as the variable fee approach. The general model is simplified if certain criteria are met by measuring the liability for remaining coverage using the premium allocation approach.

The general model uses current assumptions to estimate the amount, timing and uncertainty of future cash flows and it explicitly measures the cost of that uncertainty. It takes into account market interest rates and the impact of policyholders' options and guarantees.

The standard is effective for annual reporting periods beginning on or after 1 January 2021, with early application permitted. It is applied retrospectively unless impracticable, in which case the modified retrospective approach or the fair value approach is applied. An exposure draft *Amendments to CIFRS 17* addresses concerns and implementation challenges that were identified after CIFRS 17 was published. One of the main changes proposed is the deferral of the date of initial application of CIFRS 17 by one year to annual periods beginning on or after 1 January 2022.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

37. NEW AND REVISED CIFRS STANDARDS IN ISSUE BUT NOT YET EFFECTIVE (Continued)

CIFRS 17 Insurance Contracts (Continued)

For the purpose of the transition requirements, the date of initial application is the start if the annual reporting period in which the entity first applies the standard, and the transition date is the beginning of the period immediately preceding the date of initial application.

The Directors do not expect that the adoption of this standard will have a material impact on the financial statements of the Company in future periods.

CIFRS 10 and CIAS 28 (amendments) Sale or Contribution of Assets between an Investor and its Associate or Joint Venture

The amendments to CIFRS 10 and CIAS 28 deal with situations where there is a sale or contribution of assets between an investor and its associate or joint venture. Specifically, the amendments state that gains or losses resulting from the loss of control of a subsidiary that does not contain a business in a transaction with an associate or a joint venture that is accounted for using the equity method, are recognised in the parent's profit or loss only to the extent of the unrelated investors' interests in that associate or joint venture. Similarly, gains and losses resulting from the remeasurement of investments retained in any former subsidiary (that has become an associate or a joint venture that is accounted for using the equity method) to fair value are recognised in the former parent's profit or loss only to the extent of the unrelated investors' interests in the new associate or joint venture.

The effective date of the amendments has yet to be set by the IASB; however, earlier application of the amendments is permitted.

The Directors do not expect that the adoption of this standard will have a material impact on the financial statements of the Company in future periods.

Amendments to CIAS 1 and CIAS 8 Definition of material

The amendments are intended to make the definition of material in CIAS 1 easier to understand and are not intended to alter the underlying concept of materiality in CIFRS Standards. The concept of 'obscuring' material information with immaterial information has been included as part of the new definition.

The threshold for materiality influencing users has been changed from `could influence' to `could reasonably be expected to influence'.

The definition of material in CIAS 8 has been replaced by a reference to the definition of material in CIAS 1. In addition, the IASB amended other Standards and the Conceptual Framework that contain a definition of material or refer to the term 'material' to ensure consistency.

The amendments are applied prospectively for annual periods beginning on or after 1 January 2020, with earlier application permitted.

The Directors do not expect that the adoption of this standard will have a material impact on the financial statements of the Company in future periods.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

37. NEW AND REVISED CIFRS STANDARDS IN ISSUE BUT NOT YET EFFECTIVE (Continued)

Amendments to References to the Conceptual Framework in CIFRS Standards

Together with the revised *Conceptual Framework*, which became effective upon publication on 29 March 2018, the IASB has also issued *Amendments to References to the* Conceptual Framework in *IFRS Standards*. The document contains amendments to CIFRS 2, CIFRS 3, CIFRS 6, CIFRS 14, CIAS 1, CIAS 8, CIAS 34, CIAS 37, CIAS 38, CIFRIC 12, CIFRIC 19, CIFRIC 20, CIFRIC 22, and SIC-32.

Not all amendments, however, update those pronouncements with regard to references to and quotes from the framework so that they refer to the revised *Conceptual Framework*. Some pronouncements are only updated to indicate which version of the Framework they are referencing to (the IASC *Framework* adopted by the IASB in 2001, the IASB *Framework* of 2010, or the new revised *Framework* of 2018) or to indicate that definitions in the Standard have not been updated with the new definitions developed in the revised *Conceptual Framework*.

The amendments, where there actually are updates, are effective for annual periods beginning on or after 1 January 2020, with early application permitted.

The Directors do not expect that the adoption of this standard will have a material impact on the financial statements of the Company in future periods.

38. EVENTS AFTER REPORTING PERIOD

With the Covid-19 outbreak and a potential partial suspension of everything but arms (EBA) tax relief by the European Union, the management has assessed the impact on the financial statements of the Company and concluded that these are non-adjusting events and there is minimal impact to the Company's financial statements given the size of the related portfolios at the year end.
